

ICTWS 2027

10th International Conference on Thin-Walled Structures

Conference Chair: **Raffaele Landolfo**

Napoli (Italy), 7–9 October 2027

Congress Centre Università degli Studi di Napoli Federico II

SAVE THE DATE AND CALL FOR ABSTRACTS

Conference Topics

ICTWS2027 aims to provide a forum where researchers and designers join to present, discuss and disseminate the most recent theoretical, numerical and experimental advances in all areas related to thin-walled structures.

Authors are kindly invited to submit abstracts on the following topics according to the template available at the conference website

- **Steel, stainless steel and aluminium structures**
- **Fibre composite and other material structures**
- **Members, connections and joints**
- **Plates and shells**
- **Advanced analysis methods**
- **Optimisation methods and applications**
- **Impact and progressive collapse**
- **Additive manufacturing (3D printing)**
- **Deployable and inflatable structures**
- **Machine learning in engineering design**
- **Fatigue, durability and long-term performance**
- **Cold-formed twin-walled metallic structural systems**
- **Lightweight steel drywall non-structural systems**
- **Fire behaviour and thermo-mechanical performance**

Key dates

Abstract submission opens	28 May 2026
Abstract submission deadline	31 July 2026
Abstract acceptance	30 October 2026
Full paper submission deadline	26 February 2027
Final paper acceptance	31 May 2027
Early Bird Registration	15 June 2027

Options for the conference paper

Authors, whose abstract will be accepted by the Scientific Committee, will be requested to upload a Full Paper within the deadline.

Two options are available for the conference paper:

- **Option 1: Conference Use Only**
Papers will be included exclusively in the conference repository and provided as part of the conference package. These contributions will not be formally published or indexed.
- **Option 2: Conference Use and Publication in the Proceedings**
Papers will be published in the conference proceedings and indexed in major scientific databases, subject to the authors' consent.

Please note that Authors are required to indicate their preferred option when submitting the abstract.

Authors of a selection of high-quality papers will be invited to submit an extended version of their work for consideration for publication in a dedicated special issue of the journal Thin-Walled Structures. The selection will be made independently of the option chosen for the conference paper.

Organizing Secretariat

Rione Sirignano 5 - 80121 Napoli (Italy)
